

Reflections on your eyeglasses can cause hazy, fuzzy, ghost images and halos that impair how you see through them. These reflections make it more difficult for you to see especially during night time driving, watching TV, working at a computer and working under fluorescent lights. We at Cottone Family Eyecare can improve your vision through your glasses during these activities and all activities with the help of Teflon® Clear Coat Lenses.

Teflon® Clear Coat Lenses eliminates all reflections so that you can see clearer and crisper than with ordinary lenses. All people, young and old, can benefit from the clearness they will have with Teflon® Clear Coat Lenses. Not only does it improve your vision it also helps you look better. The reflections that people would see off your lenses disappear and only your eyes will show with this amazing coating.

Teflon® Clear Coat Lenses also offers built-in scratch protection and an easy-care surface that makes it easy to clean and take care of. Cottone Family Eyecare is one of the few offices in the Chicago land area that can offer you Teflon® Clear Coat Lenses and would be happy to show you some in office examples and answer any questions. Next time you're in for your appointment ask one of our helpful staff about how you can begin seeing as clearly as you should through your glasses!
